

Outdoor living at its best!

How are we so affordable?

- We make the Amish Crafted Gazebos in bulk during the winter months when we are not so busy.
- We mass produce the interchangeable parts, allowing economies of scale to work for you in an amazingly efficient manner.
- We limit the sizes, styles, shapes, materials, and options so we can pull your gazebo components "off the shelf."

Dear Mel,
Thanks for explaining why your octagonal wood deck is the way to go. You were right, when I priced the materials at our local Home Depot, including pressure treated lumber, stainless hardware, and tools, etc., my cost would have been very substantial.
By the way, a couple contractor friends of mine charge between \$15 and \$20 per square foot to install decks in homes around here, so your price at \$10 a square foot for the 10 ft. octagonal deck is quite reasonable.
I appreciate your help. You and Liz are very knowledgeable and easy to reach.
